

Private vs. Social costs

Divergences

- Market prices do not reflect opportunity costs
- Private = market prices
- Social = opportunity costs to society

Reasons for Divergences

1. Market Failures

- Market power
- Externalities
 - Public goods
 - Missing markets
 - Incomplete property rights

2. Distortions – result of policies that affect prices of commodities or factors

- Commodity taxes/subsidies
- Marketing restrictions/regulations
- Taxes on economic activities
- Etc.

Market analysis of divergences

- Need to consider effects on
- Consumers (CS)
- Producers (PS)
- Government budget (B)
- External effects or third-party costs (EE)

Examples of market analysis

- Market failures
 - Market power
 - Externalities
- Market distortions (policies)
 - Domestic markets (no trade)
 - Commodity taxes/subsidies
 - Quantitative restrictions
 - International trade (small country)
 - International trade (large country)

Welfare Effects of Negative Externality
