ARTICLE I - BACKGROUND AND OBJECTIVES

- A. This Cooperative and Joint Venture Agreement (hereinafter called agreement) between the Bureau of Land Management, U.S. Geological Survey–Biological Resources Division, National Park Service, U.S. Forest Service and Department of Defense–Office of Deputy Under Secretary of Defense (Environmental Security) (hereinafter called Federal Agencies), and Arizona Board of Regents The University of Arizona and its partner institutions is to establish and maintain the Desert Southwest Cooperative Ecosystem Studies Unit. The Desert Southwest CESU is associated with a national network of CESUs.
- B. The objectives of the Desert Southwest Cooperative Ecosystem Studies Unit (CESU) are to:
- Provide research, technical assistance and education to federal land management, environmental and research agencies and their potential partners;
 - Develop a program of research, technical assistance and education that involves the biological, physical, social, and cultural sciences needed to address resources issues and interdisciplinary problem-solving at multiple scales and in an ecosystem context at the local, regional, and national level; and
 - Place special emphasis on the working collaboration among federal agencies and universities and their related partner institutions.
- C. The Bureau of Land Management (hereinafter called BLM) administers public lands within a framework of numerous laws. The most comprehensive of these is the Federal Land Policy and Management Act of 1976 (FLPMA). All Bureau policies, procedures and management actions must be consistent with FLPMA and the other laws that govern use of the public lands. It is the mission of the Bureau of Land Management to sustain the health, diversity and productivity of the public lands for the use and enjoyment of present and future generations (43 U.S.C. 1701 et seq.). In accordance with 43 U.S.C. 1737(b), the BLM is authorized to enter into a cooperative agreement to establish the Desert Southwest CESU to assist in providing research, technical assistance and education.
- D. The U.S. Geological Survey–Biological Resources Division (hereinafter called BRD) works with others to provide scientific understanding and technologies needed to support the sound management and conservation of our Nation's biological resources (Secretarial Order No. 3202). In accordance with 16 U.S.C.1a-2j, 16 U.S.C. 5933 and Secretarial Order No. 3202, the BRD is authorized to enter into a cooperative agreement to establish the Desert Southwest CESU to assist in providing research, technical assistance and education.

- E. The National Park Service (hereinafter called NPS) is responsible for the management of areas in the National Park System to conserve the scenery, the natural and historic objects, and the wildlife therein and to provide for the enjoyment of the same in such a manner and by such means as will leave them unimpaired for the enjoyment of future generations (16 U.S.C. 1 et seq.). In accordance with 16 U.S.C. 1a-2j and 16 U.S.C. 5933, the NPS is authorized to enter into a cooperative agreement to establish the Desert Southwest CESU to assist in providing research, technical assistance and education.
- F. The U.S. Forest Service (hereinafter called USFS) mission is to achieve quality land management under the sustainable multiple-use management concept to meet the diverse needs of the people (16 U.S.C. 1641-1646). In accordance with 7 U.S.C. 3318 (b) the USFS is authorized to enter into a joint venture agreement to establish the Desert Southwest CESU to assist in providing research, technical assistance and education.
- G. The Department of Defense (hereinafter called DoD) manages nearly 25 million acres of land, and the natural and cultural resources found there, and for this agreement includes the Office of the Secretary of Defense, the Military Services, the Defense Logistics Agency, the National Guard Bureaus, and the Military Reserve Components. DoD's primary mission is national defense. DoD's conservation program supports this mission by ensuring realistic training areas, and managing its resources in ways that maximize available land, air, and water training opportunities. DoD environmental stewardship activities are authorized under the Sikes Act, as amended. In accordance with 16 U.S.C. 670, as amended, the DoD is authorized to enter into a cooperative agreement to establish the Desert Southwest CESU to assist in providing research, technical assistance, and education.
- H. The University of Arizona (hereinafter called Host University) is a comprehensive university that houses the state's only colleges of Agriculture, Law, Medicine and Pharmacy. Approximately 7000 graduate students are enrolled in 80 doctoral programs, and 110 master's and specialists programs. The purpose of the University is, in the language of the original law, "to provide the inhabitants of this state with the means of acquiring a thorough knowledge of the various branches of literature, science, and the arts," and, insofar as possible, to provide a technical education adapted to the development of Arizona's resources. A number of departments within the University have contributed to a long-standing history of cooperative research and education in desert ecosystem management. The University hosts a number of federal cooperative research units and maintains working relationships with federal land management agencies. The University is governed by the Arizona Board of Regents.

- I. The partner institutions to the Host University include Howard University, New Mexico State University, Southwest Texas State University, University of California – Riverside, Arizona-Sonora Desert Museum, Sonoran Institute (hereinafter called Partner Institutions).
