

Spring 2025

SCIENCE OF KINDNESS UNDERGRADUATE RESEARCH TEAM

SCIENCE OF KINDNESS
COMMUNITY COLLECTIVE

Join the SciKind Research Team!

Whether you're new to research or building on existing skills, the Science of Kindness Community Collective (SciKind Team) offers a unique opportunity to explore how kindness transforms communities through applied research. As part of the SciKind Team, you'll engage in both qualitative and quantitative methods, building foundational skills in community-engaged research and studying the impact of kindness/prosocial connection. This experience will not only enhance your academic development but also positively impact your personal life by deepening your understanding of the importance of kindness and community connection. Team members can enroll in an independent study course led by Dr. Jeannette Maré, where you'll expand your research skills and help build a more connected, healthier community.

APPLICATION PROCESS:

1. Scan the QR code on this document or visit the SciKind VIP page.
2. Fill out the VIP Interest Form at the bottom of the page.
3. Choose "Science of Kindness Community Collective" as your team of interest.
4. Our team will be in touch soon!

Learning Objectives:

- *Build foundational skills in qualitative and quantitative research methods.*
- *Develop practical skills in community-engaged research.*
- *Collaborate effectively within an interdisciplinary team and with diverse community partners.*
- *Gain insights into how kindness/prosocial connection impacts individuals and communities.*
- *Contribute to meaningful research that fosters curiosity.*
